**Mikael Wigell, Sören Scholvin, Mika Aaltola**

**Statecraft** Margaret Thatcher, 2017-06-29 Lady Thatcher, a unique figure in global politics, shares her views about the dangers and opportunities of the new millennium.

Politics and Strategy Peter Trubowitz, 2011-03-14 Why do some national leaders pursue ambitious grand strategies and adventuresome foreign policies while others do not? When do leaders boldly confront foreign threats and when are they less assertive? Politics and Strategy shows that grand strategies are Janus-faced: their formulation has as much to do with a leader's ability to govern at home as it does with maintaining the nation's security abroad. Drawing on the American political experience, Peter Trubowitz reveals how variations in domestic party politics and international power have led presidents from George Washington to Barack Obama to pursue strategies that differ widely in international ambition and cost. He considers why some presidents overreach in foreign affairs while others fail to do enough. Trubowitz pushes the understanding of grand strategy beyond traditional approaches that stress only international forces or domestic interests. He provides insights into how past leaders responded to cross-pressures between geopolitics and party politics, and how similar issues continue to bedevil American statecraft today. He suggests that the trade-offs shaping American leaders' foreign policy choices are not unique--analogous trade-offs confront Chinese and Russian leaders as well. Combining innovative theory and historical analysis, Politics and Strategy answers classic questions of statecraft and offers new ideas for thinking about grand strategies and the leaders who make them.

*Military Statecraft and the Rise of Shaping in World Politics* Kyle J. Wolfley, 2021-06-29 Winner of the Andrew F. Krepinevich Writing Award A 2022 Choice Reviews Outstanding Academic Title Selected for the Irregular Warfare Initiative's Inaugural Reading List (2022) In today's complex international environment, how do the United States, China, and Russia manage the return of great power competition as well as the persistent threat of violent non-state actors? This book explores shaping: the use of military power to construct a more favorable environment by influencing the characteristics of other militaries, altering the relationships between them, or managing the behavior of allies. As opposed to traditional strategies of warfighting or coercion, shaping relies less on threats, demonstrations, and uses of violence and more on attraction, persuasion, and legitimacy. Because shaping relies more on soft power than on hard power, this approach contradicts the conventional wisdom of the purpose militaries serve. Kyle J. Wolfley explores the emergence of shaping in classical strategy

and its increased frequency following the end of the Cold War when threats and allies became more ambiguous. He illustrates the four logics of shaping—attraction, socialization, delegation, and assurance—through five case studies of recent major military exercise programs led by the United States, China, India, the United Kingdom, and Russia. Moreover, the author reveals through sentiment analysis and statistics of over one thousand multinational exercises from 1980 to 2016 how major powers reacted to a complex international environment by expanding the number and scope of shaping exercises. Illuminating an understudied but surprisingly common tool of military statecraft, this book offers a fresh understanding of military power in today's competitive international system.

*The Downing Street Years* Margaret Thatcher, 2011-01-04 This first volume of Margaret Thatcher's memoirs encompasses the whole of her time as Prime Minister - the formation of her goals in the early 1980s, the Falklands, the General Election victories of 1983 and 1987 and, eventually, the circumstances of her fall from political power. She also gives frank accounts of her dealings with foreign statesmen and her own ministers.

**Germany Unified and Europe Transformed** Philip Zelikow, Condoleezza Rice, 1997 This work provides an analysis of the moves and manoeuvres that brought an end to the Cold War division of Europe. Coverage includes discussion of the opening of the Berlin Wall and a study of the relationship between West German Chancellor Helmut Kohl and reform Communist leader, Hans Modrow.

**War by Other Means** Robert D. Blackwill, Jennifer M. Harris, 2016-04-12 A Foreign Affairs Best Book of 2016 Today, nations increasingly carry out geopolitical combat through economic means. Policies governing everything from trade and investment to energy and exchange rates are wielded as tools to win diplomatic allies, punish adversaries, and coerce those in between. Not so in the United States, however. America still too often reaches for the gun over the purse to advance its interests abroad. The result is a playing field sharply tilting against the United States. "Goeconomics, the use of economic instruments to advance foreign policy goals, has long been a staple of great-power politics. In this impressive policy manifesto, Blackwill and Harris argue that in recent decades, the United States has tended to neglect this form of statecraft, while China, Russia, and other illiberal states have increasingly employed it to Washington's disadvantage." —G. John Ikenberry, *Foreign Affairs* "A readable and lucid primer...The book defines the extensive topic and opens readers' eyes to its prevalence throughout history...[Presidential] candidates who care more about protecting American interests would be wise to heed the advice of *War by Other Means* and take our goeconomic toolkit more seriously. —Jordan Schneider, *Weekly Standard*

Financialising City Statecraft and Infrastructure Andy Pike, Peter O'Brien, Tom Strickland, John Tomaney, 2019 *Financialising City Statecraft and Infrastructure* addresses the struggles of national and local states to fund, finance and govern urban infrastructure. It develops fresh thinking on financialisation and city statecraft to explain the socially and

spatially uneven mixing of managerial, entrepreneurial and financialised city governance in austerity and limited decentralisation across England. As urban infrastructure fixes for the London global city-region risk undermining national 'rebalancing' efforts in the UK, city statecraft in the rest of the country is having uneasily to combine speculation, risk-taking and prospective venturing with co-ordination, planning and regulation.

The Path to Power Margaret Thatcher, 2011-01-04 In her international bestseller, *The Downing Street Years*, Margaret Thatcher provided an acclaimed account of her years as Prime Minister. This second volume reflects on the early years of her life and how they influenced her political career.

**Leadership** Henry Kissinger, 2022-06-28 Kissinger's six leaders are Konrad Adenauer, Charles de Gaulle, Richard Nixon, Anwar Sadat, Lee Kuan Yew, and Margaret Thatcher. All of them were formed in a period when established institutions collapsed all over Europe, colonial structures gave way to independent states in Asia and Africa, and a new international order had to be created from the vestiges of the old. Kissinger penetratingly analyses each of these leaders' careers through the highly individual strategies of statecraft which he presents them as embodying, to show how it is the combination of character and circumstance which creates history. Kissinger's public experience, personal knowledge and historical perceptions enrich the book with insights and judgements such as only he could make.

*Geo-economics and Power Politics in the 21st Century* Mikael Wigell, Sören Scholvin, Mika Aaltola, 2018-07-06 Starting from the key concept of geo-economics, this book investigates the new power politics and argues that the changing structural features of the contemporary international system are recasting the strategic imperatives of foreign policy practice. States increasingly practice power politics by economic means. Whether it is about Iran's nuclear programme or Russia's annexation of Crimea, Western states prefer economic sanctions to military force. Most rising powers have also become cunning agents of economic statecraft. China, for instance, is using finance, investment and trade as means to gain strategic influence and embed its global rise. Yet the way states use economic power to pursue strategic aims remains an understudied topic in International Political Economy and International Relations. The contributions to this volume assess geo-economics as a form of power politics. They show how power and security are no longer simply coupled to the physical control of territory by military means, but also to commanding and manipulating the economic binds that are decisive in today's globalised and highly interconnected world. Indeed, as the volume shows, the ability to wield economic power forms an essential means in the foreign policies of major powers. In so doing, the book challenges simplistic accounts of a return to traditional, military-driven geopolitics, while not succumbing to any unfounded idealism based on the supposedly stabilising effects of interdependence on international relations. As such, it advances our understanding of geo-economics as a strategic practice and as an innovative and timely analytical approach. This book will be of much interest to students of security studies, international political economy, foreign policy and International Relations in general.

**To Build a Better World** Philip Zelikow, Condoleezza Rice, 2019-09-10 A deeply researched international history and exemplary study (New York Times Book Review) of how a divided world ended and our present world was fashioned, as the world drifts toward another great time of choosing. Two of America's leading scholar-diplomats, Philip Zelikow and Condoleezza Rice, have combed sources in several languages, interviewed leading figures, and drawn on their own firsthand experience to bring to life the choices that molded the contemporary world. Zeroing in on the key moments of decision, the might-have-beens, and the human beings working through them, they explore both what happened and what could have happened, to show how one world ended and another took form. Beginning in the late 1970s and carrying into the present, they focus on the momentous period between 1988 and 1992, when an entire world system changed, states broke apart, and societies were transformed. Such periods have always been accompanied by terrible wars -- but not this time. This is also a story of individuals coping with uncertainty. They voice their hopes and fears. They try out desperate improvisations and careful designs. These were leaders who grew up in a postwar world, who tried to fashion something better, more peaceful, more prosperous, than the damaged, divided world in which they had come of age. New problems are putting their choices, and the world they made, back on the operating table. It is time to recall not only why they made their choices, but also just how great nations can step up to great challenges. Timed for the thirtieth anniversary of the fall of the Berlin Wall, *To Build a Better World* is an authoritative depiction of contemporary statecraft. It lets readers in on the strategies and negotiations, nerve-racking risks, last-minute decisions, and deep deliberations behind the dramas that changed the face of Europe -- and the world -- forever.

**The Second Nuclear Age** Paul Bracken, 2012-11-13 A leading international security strategist offers a compelling new way to think about the unthinkable. The cold war ended more than two decades ago, and with its end came a reduction in the threat of nuclear weapons—a luxury that we can no longer indulge. It's not just the threat of Iran getting the bomb or North Korea doing something rash; the whole complexion of global power politics is changing because of the reemergence of nuclear weapons as a vital element of statecraft and power politics. In short, we have entered the second nuclear age. In this provocative and agenda-setting book, Paul Bracken of Yale University argues that we need to pay renewed attention to nuclear weapons and how their presence will transform the way crises develop and escalate. He draws on his years of experience analyzing defense strategy to make the case that the United States needs to start thinking seriously about these issues once again, especially as new countries acquire nuclear capabilities. He walks us through war-game scenarios that are all too realistic, to show how nuclear weapons are changing the calculus of power politics, and he offers an incisive tour of the Middle East, South Asia, and East Asia to underscore how the United States must not allow itself to be unprepared for managing such crises. Frank in its tone and farsighted in its analysis, *The Second Nuclear Age* is the essential guide to the new rules of international politics.

21st-Century Statecraft Nayef R.F. Al-Rodhan,2022-01-01 From civilisational frontier risks associated with new challenges like disruptive technologies, to the shifting nature of great-power conflicts and subversion, the 21st century requires a new approach to statecraft. In 21st-Century Statecraft, Professor Nayef Al-Rodhan proposes five innovative statecraft concepts. He makes the case for a new method of geopolitical analysis called 'meta-geopolitics', and for 'dignity-based governance'. He shows how, in an interdependent and interconnected world, traditional thinking must move beyond zero-sum games and focus on 'multi-sum and symbiotic realist' interstate relations. This requires a new paradigm of global security premised on five dimensions of security, and a new concept of power, 'just power', which highlights the centrality of justice to state interests. These concepts enable states to balance competing interests and work towards what the author calls 'reconciliation statecraft'. Throughout, Professor Al-Rodhan brings his philosophical and neuroscientific expertise to bear, providing a practical model for conducting statecraft in a sustainable way.

*Minilateralism* Chris Brummer,2014-04-07 Economic diplomacy is changing. The multilateral organizations that dominated the last half of the twentieth century no longer monopolize economic affairs. Instead, countries are resorting to more modest 'minilateral' strategies like trade alliances, informal 'soft law' agreements, and financial engineering to manage the global economy. Like traditional modes of economic statecraft, these tools are aimed at both liberalizing and supervising international financial policy in a world of diverse national interests. But unlike before, they are specifically tailored to navigating a post-American (and post-Western) world where economic power is more diffuse than ever before. This book explains how these strategies work and reveals how this new diplomatic toolbox will reshape how countries do business with one another for decades to come.

**How to Run the World** Parag Khanna,2011-01-11 Here is a stunning and provocative guide to the future of international relations—a system for managing global problems beyond the stalemates of business versus government, East versus West, rich versus poor, democracy versus authoritarianism, free markets versus state capitalism. Written by the most esteemed and innovative adventurer-scholar of his generation, Parag Khanna's How to Run the World posits a chaotic modern era that resembles the Middle Ages, with Asian empires, Western militaries, Middle Eastern sheikhdoms, magnetic city-states, wealthy multinational corporations, elite clans, religious zealots, tribal hordes, and potent media seething in an ever more unpredictable and dangerous storm. But just as that initial "dark age" ended with the Renaissance, Khanna believes that our time can become a great and enlightened age as well—only, though, if we harness our technology and connectedness to forge new networks among governments, businesses, and civic interest groups to tackle the crises of today and avert those of tomorrow. With his trademark energy, intellect, and wit, Khanna reveals how a new "mega-diplomacy" consisting of coalitions among motivated technocrats, influential executives, super-philanthropists, cause-mopolitan activists, and everyday churchgoers can assemble the talent, pool the money, and deploy the resources to make the global economy

fairer, rebuild failed states, combat terrorism, promote good governance, deliver food, water, health care, and education to those in need, and prevent environmental collapse. With examples taken from the smartest capital cities, most progressive boardrooms, and frontline NGOs, Khanna shows how mega-diplomacy is more than an ad hoc approach to running a world where no one is in charge—it is the playbook for creating a stable and self-correcting world for future generations. *How to Run the World* is the cutting-edge manifesto for diplomacy in a borderless world.

**Crippling Leviathan** Melissa M. Lee Desfor, 2020-04-15 Policymakers worry that ungoverned spaces pose dangers to security and development. Why do such spaces exist beyond the authority of the state? Earlier scholarship—which addressed this question with a list of domestic failures—overlooked the crucial role that international politics play. In this shrewd book, Melissa M. Lee argues that foreign subversion undermines state authority and promotes ungoverned space. Enemy governments empower insurgents to destabilize the state and create ungoverned territory. This kind of foreign subversion is a powerful instrument of modern statecraft. But though subversion is less visible and less costly than conventional force, it has insidious effects on governance in the target state. To demonstrate the harmful consequences of foreign subversion for state authority, *Crippling Leviathan* marshals a wealth of evidence and presents in-depth studies of Russia's relations with the post-Soviet states, Malaysian subversion of the Philippines in the 1970s, and Thai subversion of Vietnamese-occupied Cambodia in the 1980s. The evidence presented by Lee is persuasive: foreign subversion weakens the state. She challenges the conventional wisdom on statebuilding, which has long held that conflict promotes the development of strong, territorially consolidated states. Lee argues instead that conflictual international politics prevents state development and degrades state authority. In addition, *Crippling Leviathan* illuminates the use of subversion as an underappreciated and important feature of modern statecraft. Rather than resort to war, states resort to subversion. Policymakers interested in ameliorating the consequences of ungoverned space must recognize the international roots that sustain weak statehood.

COVID-19 and World Order Hal Brands, Francis J. Gavin, 2020-09-08 Leading global experts, brought together by Johns Hopkins University, discuss national and international trends in a post-COVID-19 world. The ongoing COVID-19 pandemic has killed hundreds of thousands of people and infected millions while also devastating the world economy. The consequences of the pandemic, however, go much further: they threaten the fabric of national and international politics around the world. As Henry Kissinger warned, The coronavirus epidemic will forever alter the world order. What will be the consequences of the pandemic, and what will a post-COVID world order look like? No institution is better suited to address these issues than Johns Hopkins University, which has convened experts from within and outside of the university to discuss world order after COVID-19. In a series of essays, international experts in public health and medicine, economics, international security, technology, ethics, democracy, and governance imagine a bold new vision for our future. Essayists include: Graham Allison, Anne Applebaum, Philip Bobbitt, Hal Brands, Elizabeth Economy, Jessica Fanzo, Henry Farrell,

Peter Feaver, Niall Ferguson, Christine Fox , Jeremy A. Greene, Hahrie Han, Kathleen H. Hicks, William Inboden, Tom Inglesby, Jeffrey P. Kahn, John Lipsky, Margaret MacMillan, Anna C. Mastroianni, Lainie Rutkow, Kori Schake, Eric Schmidt, Thayer Scott, Benn Steil, Janice Gross Stein, James B. Steinberg, Johannes Urpelainen, Dora Vargha, Sridhar Venkatapuram, and Thomas Wright. In collaboration with and appreciation of the book's co-editors, Professors Hal Brands and Francis J. Gavin of the Johns Hopkins SAIS Henry A. Kissinger Center for Global Affairs, Johns Hopkins University Press is pleased to donate funds to the Maryland Food Bank, in support of the university's food distribution efforts in East Baltimore during this period of food insecurity due to COVID-19 pandemic hardships.

**Teaching Common Sense** Linda Kulman, Henry Kissinger, 2016-06-07 How is critical thinking taught? How will the next generation cope with an ever-changing and increasingly complex world? These are questions that the Grand Strategy program at Yale seeks to address. The Brady-Johnson Program in Grand Strategy seeks to revive the study and practice of grand strategy by devising methods to teach that subject at the graduate and undergraduate levels, by training future leaders to think about and implement grand strategies in imaginative and effective ways, and by organizing public events that emphasize the importance of grand strategy. The program defines “grand strategy” as a comprehensive plan of action, based on the calculated relationship of means to large ends. Never an exact science, grand strategy requires constant reassessment and adjustment. Flexibility is key. Traditionally believed to belong to and best-developed in the politico-military and governmental realms, the concept of grand strategy applies—and ISS believes is essential—to a broad spectrum of human activities, not least those of international institutions, non-governmental organizations, and private businesses and corporations. For fifteen years, the Grand Strategy program has been cultivating leadership skills of undergraduates and graduate students of Yale University. In Linda Kulman’s compelling book, we learn about this remarkable program from the inside, sharing the stress of the “murder boards,” the revelation of applying the classics to current geopolitical situations, and the crucial importance of fast decision-making under duress. Teaching Common Sense weaves together on-site reporting, archival research, and original survey data into an intellectual history of the Grand Strategy program.

**The Oxford Handbook of Grand Strategy** Thierry Balzacq, Ronald R. Krebs, 2021-09-13 A clearly articulated, well-defined, and relatively stable grand strategy is supposed to allow the ship of state to steer a steady course through the roiling seas of global politics. However, the obstacles to formulating and implementing grand strategy are, by all accounts, imposing. The Oxford Handbook of Grand Strategy addresses the conceptual and historical foundations, production, evolution, and future of grand strategy from a wide range of standpoints. The seven constituent sections present and critically examine the history of grand strategy, including beyond the West; six distinct theoretical approaches to the subject; the sources of grand strategy, ranging from geography and technology to domestic politics to individual psychology and culture; the instruments of grand strategy's implementation, from military to economic to covert action; political actors',

including non-state actors', grand strategic choices; the debatable merits of grand strategy, relative to alternatives; and the future of grand strategy, in light of challenges ranging from political polarization to technological change to aging populations. The result is a field-defining, interdisciplinary, and comparative text that will be a key resource for years to come.
