Polling Student Voices for School Improvement

Paris S. Strom, Robert D. Strom, 2023-11-01

The purpose of this book is to help secondary school principals and college faculty fulfill their key role for continuous improvement planning of educational practices and safety at their institution. Rapid social and technological advances have motivated the consideration of student voice in schools across the United States. By merging student voice and educator expertise, an intergenerational perspective can emerge that more accurately portrays the strengths and limitations of a school. Strom and Strom began their research on student voice by partnering with adolescents and principals from several schools to identify topics they saw as appropriate for polling to improve schools. This effort led to the development of ten polls on school stress, career exploration, time management, attention and distraction, tutoring, peer support, school cheating, frustration, cyberbullying, and Internet learning. Every poll contains 15 to 20 multiple-choice items. The process model for polling includes a step-by-step procedure that educational leaders can use to plan and implement school improvement. Different methods of data analysis and ways to report overall evidence-based school results are presented by age, gender, grade and ethnicity. Student polling is distinctive from other assessment strategies because the target for data gathering is a single school, without comparison to other schools. This narrow base to assess student voice ensures poll results are anonymous and have local relevance to guide stakeholder responses. The results of polling can provide data-based evidence that can be used for continuous education improvement planning. An additional benefit is to separately assess students in special education, gifted and talented programs, and second language acquisition learners. Our website at learningpolls.org is intended to further inform educational leaders and invite their collaboration.

Routledge Handbook of Transnational Terrorism

Nicolas Stockhammer, 2023-08-17

This handbook provides contributions by some of the world-leading experts in the field on recent phenomena and trends in transnational terrorism. Based on the methodological approach of a trend-and-key factor analysis of transnational terrorism and processed on the virtual platform Foresight Strategy Cockpit (FSC), the volume seeks to examine what potential future variants of transnational terrorism may evolve. Focusing on the latest structural developments in the sphere of politically or religiously motivated violence, the handbook considers the tactical, strategic, and not least the systemic dimension of terrorism. Divided into seven thematic sections, the handbook’s contributions cover a wide range of issues, dealing among others with strategic
and hybrid terrorism, the systemic dimension of extremist violence, prevalent actors, counter-narratives, the crime terror-
nexus, the role of digitalization and the spiral dynamic between Islamist and right-wing terrorism. The expert contributions
provide a condensed overview of current developments, structural linkages and important academic debates centering
around transnational salafi-jihadi terrorism, but also right-wing terrorism and counter-terrorism. A key objective of the work
is to make the effects of prevention/preemption, (de-) radicalization and (non-) intervention both transparent and assessable.
As such, it contributes well-founded strategies, feasible solutions and options for policy-makers and counter-terrorism
experts. This volume will be of great interest to students of terrorism and counter-terrorism, political violence and security
studies.

The Unprotected Class Jeremy Carl,2024-04-23 Anti-white racism, undisguised and unembarrassed, is now official
policy in America. One class of citizens—whites—is openly discriminated against in every sphere of public and private life.
The Unprotected Class is a comprehensive explanation of how we got here and what we must do to correct a manifest—and
dangerous—injustice. Launched with an appeal to justice for all, the civil rights movement went off the rails even as it
achieved its original goals. Soon its excesses and failures were exploited to justify discrimination against whites in business,
education, law, entertainment, and even the church. With the death of George Floyd and the shedding of all pretense of racial
justice, vindictiveness, resentment, and hatred were unleashed in America.

Tools and Algorithms for the Construction and Analysis of Systems Sriram Sankaranarayanan,Natasha
Sharygina,2023-04-21 This open access book constitutes the proceedings of the 29th International Conference on Tools and
Algorithms for the Construction and Analysis of Systems, TACAS 2023, which was held as part of the European Joint Conferences on Theory and Practice of Software, ETAPS 2023, during April 22-27, 2023, in Paris, France. The 56 full papers and 6 short tool demonstration papers presented in this volume were carefully reviewed and selected from 169 submissions. The proceedings also contain 1 invited talk in full paper length, 13 tool papers of the affiliated competition SV-Comp and 1 paper consisting of the competition report. TACAS is a forum for researchers, developers, and users interested in rigorously based tools and algorithms for the construction and analysis of systems. The conference aims to bridge the gaps between different communities with this common interest and to support them in their quest to improve the utility, reliability, flexibility, and efficiency of tools and algorithms for building computer-controlled systems.

**Trippy** Ernesto Londoño, 2024-05-07 A riveting look at the tremendous promise and inherent risks of the use of psychedelics in mental health treatment through the lens of a New York Times reporter whose journalistic exploration of this emerging field began with a personal crisis. When he signed up for a psychedelic retreat run by a mysterious Argentine woman deep in Brazil’s rainforest in early 2018, Ernesto Londoño, a veteran New York Times journalist, was so depressed he had come close to jumping off his terrace weeks earlier. His nine-day visit to Spirit Vine Ayahuasca Retreat Center included four nighttime ceremonies during which participants imbibed a vomit-inducing plant-based brew that contained DMT, a powerful mind-altering compound. The ayahuasca trips provided Londoño an instant reprieve from his depression and became the genesis of a personal transformation that anchors this sweeping journalistic exploration of the booming field of medicinal psychedelics. Londoño introduces readers to a dazzling array of psychedelic enthusiasts who are upending our understanding of trauma and healing. They include Indigenous elders who regard psychedelics as portals to the spirit world; religious leaders who use mind-bending substances as sacraments; war veterans suffering from PTSD who credit psychedelics with changing their lives; and clinicians trying to resurrect a promising field of medicine hastily abandoned in the 1970s as the United States declared a War on Drugs. Londoño’s riveting personal narrative pulls the reader through a deeply researched and brilliantly reported account of a game-changing industry on the rise. Trippy is the definitive book on psychedelics and mental health today, and Londoño’s in-depth and nuanced look at this shifting landscape will be pivotal in guiding policymakers and readers as they make sense of the perils, limitations, and promises of turning to psychedelics in the pursuit of healing.

**You Have to Be Prepared to Die Before You Can Begin to Live** Paul Kix, 2023-05-02 From journalist Paul Kix, the riveting story, never before fully told, of the 1963 Birmingham Campaign—ten weeks that would shape the course of the Civil Rights Movement and the future of America. It’s one of the iconic photographs of American history: A Black teenager, a policeman and his lunging German Shepherd. Birmingham, Alabama, May of 1963. In May of 2020, as reporter Paul Kix stared at a different photo—that of a Minneapolis police officer suffocating George Floyd—he kept returning to the other photo
taken half a century earlier, haunted by its echoes. What, Kix wondered, was the full legacy of the Birmingham photo? And of the campaign it stemmed from? In You Have To Be Prepared To Die Before You Can Begin To Live, Paul Kix takes the reader behind the scenes as he tells the story of the Southern Christian Leadership Conference’s pivotal 10 week campaign in 1963 to end segregation in Birmingham, Alabama. At the same time, he also provides a window into the minds of the four extraordinary men who led the campaign—Martin Luther King, Jr., Wyatt Walker, Fred Shuttlesworth, and James Bevel. With page-turning prose that read like a thriller, Kix’s book is the first to zero in on the ten weeks of Project C, as it was known—its specific history and its echoes sounding throughout our culture now. It’s about Where It All Began, for sure, but it’s also the key to understanding Where We Are Now and Where We Will Be. As the fight for equality continues on many fronts, Project C is crucial to our understanding of our own time and the impact that strategic activism can have.

Who Wrote This? Naomi S. Baron,2023-09-12 Would you read this book if a computer wrote it? Would you even know? And why would it matter? Today's eerily impressive artificial intelligence writing tools present us with a crucial challenge: As writers, do we unthinkingly adopt AI's time-saving advantages or do we stop to weigh what we gain and lose when heeding its siren call? To understand how AI is redefining what it means to write and think, linguist and educator Naomi S. Baron leads us on a journey connecting the dots between human literacy and today's technology. From nineteenth-century lessons in composition, to mathematician Alan Turing's work creating a machine for deciphering war-time messages, to contemporary engines like ChatGPT, Baron gives readers a spirited overview of the emergence of both literacy and AI, and a glimpse of their possible future. As the technology becomes increasingly sophisticated and fluent, it's tempting to take the easy way out and let AI do the work for us. Baron cautions that such efficiency isn't always in our interest. As AI plies us with suggestions or full-blown text, we risk losing not just our technical skills but the power of writing as a springboard for personal reflection and unique expression. Funny, informed, and conversational, Who Wrote This? urges us as individuals and as communities to make conscious choices about the extent to which we collaborate with AI. The technology is here to stay. Baron shows us how to work with AI and how to spot where it risks diminishing the valuable cognitive and social benefits of being literate.

Governance in Transitional Societies in East and Southeast Asia Chi Zhang,Binh Thi An Trinh,2023-11-01 This book brings together scholars based in, or had previously been based in a range of East and Southeast Asian countries, building on their respective primary empirical data and first-hand experience as academics and think tank researchers, in order to pluralise the current debates about governance in transitional societies. In an era of global democratic backsliding, this edited volume offers less-explored local perspectives, to balance the Western-centrism observed in area studies and the focus on former Soviet countries in transit. What is the future of governance in Asia? This book, by attempting to supply a
diversity of answers, will interest political scientists, economists, and journalists.

Security Dynamics in the South China Sea Howard M Hensel, 2024-05-16 This volume examines the South China Sea’s regional security dynamics, highlighting the challenges and opportunities for both littoral and non-littoral states. The South China Sea is a vital pathway for the great container ships and tankers, as well as for the naval vessels of today. Indeed, the security of the contemporary global economy is reliant more than ever upon the dependability of freedom of navigation through the waters of the South China Sea. This volume concentrates on the security of the South China Sea sub-region. It is
designed to help illuminate the contemporary security dynamics within this important sub-region by highlighting its
development, the contemporary challenges and opportunities confronting both the littoral states and the non-littoral powers
that are active in the sub-region, and the policy responses of those states as they seek to defend and promote their national
interests. This book is composed of 16 chapters and is organized into five thematic sections. Part I of the book is designed to
set the historical context. Part II examines some of the contemporary challenges and opportunities that present themselves in
the sub-region, while Part III focuses on Chinese policy in the South China Sea sub-region. Parts IV and Part V analyse and
evaluate the contemporary policies of the various littoral and non-littoral powers that are active in the South China Sea sub-
region. The collective analyses and assessments of the contemporary perceptions and policies of the various littoral and non-
littoral powers active in the South China Sea in response to the traditional and non-traditional challenges within the sub-
region that are examined in the chapters contained in Parts III, IV, and V, framed against the material presented in Parts I
and II, provides the basis for observations concerning areas of conflicting and coinciding interests in the concluding chapter
of the book. This book will be of interest to students of the South China Sea, maritime security, Asian politics, and
international relations.
