Appearance Obsession Joni E. Johnston, 1994 Physical attractiveness is only a distant relative to self esteem yet our opinion of ourselves and others may be based on the way we look Trying to measure up to the impossible standards of the media makes us insecure and can lead to depression and other serious health problems It can even damage our relationships Here psychologist Joni E Johnston shows us how we become self conscious about our looks from an early age and develop an adversarial relationship with our bodies This well researched book offers crucial help to men women and teenagers showing how to develop and maintain positive self esteem social esteem and healthy body image

**Mirror, Mirror** Elaine Hatfield, Susan Sprecher, 1986-01-01 Mirror Mirror examines the hidden truth about good looks Through extensive research of scholarly studies and popular culture the authors provide a lively and comprehensive view of what behavioral scientists have learned about the effects of personal appearance A wealth of illustrations and photographs give visual support to the evidence presented The book explores the view that people believe good looking individuals possess almost all the virtues known to humankind consequently they treat the good looking and ugly very differently Mirror Mirror reviews the stereotypes held about people with specific characteristics and it explains the impact of height weight and attributes such as hair color eye color and facial hair on the course of social encounters The authors show that through time these reaction patterns have their effect and that good looking and unattractive persons come to be different types of people To show the relative nature of concepts of beauty the authors also present examples of what other cultures consider attractive

*The Social Psychology of Facial Appearance* Ray Bull, Nichola Rumsey, 1998-06-10

*The Social Psychology of Facial Appearance* Ray Bull, Nichola Rumsey, 2012-12-06 Several years ago Coleman 1981 reported that in 1979 one of the many international cosmetics companies had an annual sales figure of 2.38 billion nearly 1.25 million sales representatives and over 700 products the majority of these being for the face Cash and Cash 1982 noted that in 1979 U.S. consumers spent over 4 million on cosmetic products They stated that Although this practice would seem to be a fascinating aspect of human behavior on the basis of its generality and resilience social behavioral scientists have largely ignored the phenomenon so plainly or pleasingly in front of their eyes Why should people be so concerned with their facial appearance Many psychologists have argued e.g. Kleck Rubenstein 1975 not only that facial information is usually the first that is available to the perceiver but also that it is continuously available during social interaction Maruyama and Miller 1981 stated that appearance is often the first dimension upon which a stranger can be evaluated Since people tend to see others as integrated and consistent units rather than as collections of situation specific behaviors a potent and immediately evident basis for an evaluation such as physical appearance should intrude into and affect any overall and subsequent evaluation

*Appearance is Everything* Steve Jeffes, 1998 At last a revealing book about how your appearance may determine your success and happiness in life Jeffes helps readers to determine if they have been discriminated against because of their appearance Appearance is Everything will enable you to critically examine how your appearance may influence relationships academic performance and career advancement

**The Power of Looks** Bonnie Berry,2016-02-24 There is a saying that beauty is in the eye of the beholder implying that beauty is subjective But can it be said that better looking people have more social power This book provides a fascinating insight into the social stratification of people based on looks the artificial placement of people into greater and lesser power strata based on physical appearance The author analyzes different aspects of physical appearance such as faces breasts eye shapes height and weight as they are related to social power and inequality For example tall people are often associated with power with tall people being seen publicly as more capable and thus more deserving of power than shorter people The author moreover assesses how people s physical appearance affects their chances of marriage employment education and other social and economic opportunities The book contributes to and differentiates itself from current literature by emphasizing sociological theory including constructionism and critical theory and research to understand the phenomenon of social aesthetics a term coined by the author to refer to the social reaction to physical appearance

**Disappearing Persons** Benjamin Kilborne, 2002-01-01 In Disappearing Persons psychoanalyst Benjamin Kilborne looks at how we control appearance as an attempt to manage or take charge of our feelings Arguing that the psychology of appearance has not been adequately explored Kilborne deftly weaves together examples from literature and his own clinical practice to establish shame and appearance as central fears in both literature and life and describes how shame about appearance can generate not only the wish to disappear but also the fear of disappearing A hybrid of applied literature and psychoanalysis Disappearing Persons helps us to understand the roots of the psychocultural crisis confronting our increasingly appearance oriented shame driven society
