Lean Startups for Social Change Michel Gelobter,2015-11-02 For years, the lean startup has been revolutionizing both new and established businesses. In this eye - opening book, serial social entrepreneur Michel Gelobter shows how it can do the same for nonprofits. Traditionally, whether creating a new business or a new program, entrepreneurs in all sectors develop a plan, find money to fund it, and pursue it to its conclusion. The problem is, over time conditions can change drastically - but you're locked into your plan. The lean startup is all about agility and flexibility. Its mantra is "build, measure, learn": create small experimental initiatives, quickly get real - world feedback on them, and use that data to expand what works and discard what doesn't. Using dozens of social sector examples, Gelobter walks you through the process. The standard approach wastes time and money. The lean startup will help your organization vastly increase the good it does.

An Entrepreneur's Manifesto Steve Mariotti,2015-05-25 In an increasingly competitive world market, how does the United States rank? Many Americans are worried about the economic state of their nation, especially now that countries like China are becoming ever more economically powerful. What does America need to both stabilize and energize its economy? Entrepreneurship, Steve Mariotti claims, is vital. An Entrepreneur's Manifesto is Mariotti's rallying cry for the world to recognize the potential that business creation holds for the individual and the economy. Mariotti explores how entrepreneurship affects schools and prisons, developed cities and isolated villages, brick-and-mortar stores, and internet-based businesses. He takes a hard look at the research on entrepreneurial education, entrepreneurship, government policy, and the social and cultural attributes most likely to foster successful business creation, incorporating his discussions with some of the best minds on the question of entrepreneurship. Mariotti also examines how the rise of the Internet and Web-based innovations like crowdfunding have both changed—and not changed—the fundamentals of promoting those who take the ultimate gamble of going into business for themselves. As the author of several leading textbooks on the subject and founder of the Network for Teaching Entrepreneurship (NFTE), a global nonprofit organization that has educated more than 500,000 students and trained more than 5,000 teachers in 50 countries, Mariotti is both an experienced and reliable leader in what he calls the entrepreneurial revolution. Mariotti frequently writes for the Huffington Post and has been recruited by the State Department to discuss his ideas on youth entrepreneurship in Cambodia and other developing countries seeking to escape the shackles of centrally planned economic policies. Neither a dry recitation of academic theory nor a scattered collection of feel-good stories, *An Entrepreneur's Manifesto* builds on Mariotti's unique perspective to offer a critique that is both inspiring and practical. Riveting stories complement enlightening real-world perspectives, making the work relatable and inspiring. "There is no more revolutionary act," Mariotti says, "than starting a business."

The Fourth Industrial Revolution Klaus Schwab,2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic

materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

The Responsible Entrepreneur Carol Sanford, 2014-06-23 Individuals, acting on deeply held beliefs and passion, are boldly imagining and bringing into existence a different world... Whether you're a business entrepreneur, a social entrepreneur, an investment entrepreneur, or an academic, artistic, or civil servant entrepreneur, devour this important and wise book.—From the Foreword by John Fullerton Responsible entrepreneurs are a special breed, seeking to transform industries and even society itself. They challenge and refine cultural assumptions, laws, regulations, and even the processes of governance. This requires them to do and think far beyond what is usually required of business leaders. The Responsible Entrepreneur offers a blueprint for this new kind of business leadership, describing the means by which any entrepreneur can pursue a higher order of work. In it, Carol Sanford, one of the most trusted names in responsible business development, brings her vast expertise in helping executives and corporations to the entrepreneur looking to launch and scale a venture. She maps this journey through four archetypes: The Realizing Entrepreneur: Industry Game-Changer The Reconnection Entrepreneur: Society Game-Changer The Reciprocity Entrepreneur: Culture Game-Changer The Regenerative Entrepreneur: Governance Game-Changer By understanding the archetype most aligned with their goals, entrepreneurs will learn how to grow their business into a powerful platform that can leverage change, and even change the foundations that create our most pressing problems and issues. To illustrate these principles in action, The Responsible Entrepreneur features case studies based on long-term work and in-depth interviews with Google Innovation Labs, Indigenous Designs (the primary supplier for Eileen Fisher), FishPeople (who supply Costco and Google with gourmet seafood entrees), and many more. For entrepreneurs seeking to pursue world-changing results, or impact investors looking to align their capital with their values, The Responsible Entrepreneur provides the frameworks to build a business and to evaluate and direct investments to create the greatest benefit for all stakeholders. For anyone who wants to make a difference in the way businesses affect the world, The Responsible Entrepreneur lays out ways to make that aspiration focused and doable.

Entrepreneurship and Innovation: An Economic Approach Bruce A. McDaniel,2014-12-18 This is a groundbreaking economic analysis of entrepreneurship and the development process for innovation. The author strives to distinguish the role of the capitalist from that of an entrepreneur, and to show how the actions of the entrepreneur impact new employment, economic growth, and advancements in the overall standard of living. The book provides in-depth discussion of several critical concepts: the economic development of a product; Schumpeter's temporary monopoly control; the economic bounds of product and process innovations; and changing production functions. It also develops and integrates an analysis of how innovation-induced modifications in either products or processes affect both short-run and long-run average costs in production. As a special feature, each chapter includes an interview with a successful entrepreneur. Suggested readings are also provided.

As Time Goes By Chris Freeman,Francisco Louçã,2001-02-15 How can we best understand the impact of revolutionary technologies on the business cycle, the economy, and society? Why is economics meaningless without history and without an understanding of institutional and technical change? Does the 'new economy' mean the 'end of history'?an we best understand the impact of revolutionary technologies on business organization and the business cycle? These are some of the questions addressed in this authoritative analysis of modern economic growth from the Industrial Revolution to the 'New

Economy' of today. Chris Freeman has been one of the foremost researchers on innovation for a long time and his colleague Francisco Louçã is an outstanding historian of economic theory and an analyst of econometric models and methods. Together they chart the history of five technological revolutions: water-powered mechanization, steam-powered mechanization, electrification, motorization, and computerization. They demonstrate the necessity to take account of politics, culture, organizational change, and entrepreneurship, as well as science and technology in the analysis of economic growth. This is an well-informed, highly topical, and persuasive study of interest across all the social sciences.
