Business Analyst Interview Questions and Answers Abhishek Srivastava, 2020-09-18 From the Author Glad to present the latest edition of this BA interview questions and answers book which is much bigger than the previous edition and has more questions with improved answers and illustrations wherever needed. This book is written to enable business analysts to succeed in the job interviews. This book covers general business analysis core skills and situational interview questions with suggested answers. In my professional career, I have interviewed 100s of IT professionals at different levels. I came across several professionals who could not answer questions as effectively as I would have liked. Even though I can make out that they knew the answers but could not structure them well, I wanted to create a self-help book which would enable business analysts to do well in the interviews and get their dream jobs. This book has four sections as described below. Section I deals with general questions. These questions give the interviewer the first impression about your confidence, composure, and basic communication skills. This section includes general questions about you and your profile as well as general BA questions about the role and the projects. Section II Business Analysis core skills has questions relating to Requirements elicitation techniques, UML modelling, Requirements specifications, documentation, Business Analysis core skills. It covers various aspects of requirements: Use cases, process diagrams, SRS and its elements, prioritization, elicitation, verification, and validation, etc. It is also the longest section of the book. Section III deals with Agile SCRUM and user stories. There are advanced questions relating to personas and application usability as well. Section IV includes some additional questions on Business analysis. Section V deals with the situation scenario-based questions. These questions are asked in the BA interviews regularly. I have tried to cover 20 situations/questions to provide a wide coverage. Each of the answers has been provided with the context and suggested answers. Contributors! must thank my colleagues Rashmi Srivastava and Neha for the sincere and diligent contributions to help me with inputs and feedbacks. Abhishek Srivastava
