Care Work The Quest For Security

N. Hanlon

Care Work Mary E. Daly, 2001 This insightful volume argues that care workers—those looking after children, the elderly, and people with disabilities—require security similar to any other group of workers. It provides a valuable overview and analysis of care work as a relevant social policy phenomenon in industrialized and developing countries around the world, while exploring pivotal questions such as how provisions for care are made, who is to benefit, and who is to pay.

Masculinities, Care and Equality N. Hanlon, 2012-07-31 This book explores men's ambiguous relationship with intimate caring work within a context where carefree and nurturing expectations for men are competing for influence. For men, to be more involved carers clashes with commonly valued expectations of them as men and this book analyses how men confront this contradictory expectation.

Gender, Migration, and the Work of Care Sonya Michel, Ito Peng, 2017-08-21 This book explores how around the world, women's increased presence in the labor force has reorganized the division of labor in households, affecting different regions depending on their cultures, economies, and politics; as well as the nature and size of their welfare states and the gendering of employment opportunities. As one result, the authors find, women are increasingly migrating from the global south to become care workers in the global north. This volume focuses on changing patterns of family and gender relations, migration, and care work in the countries surrounding the Pacific Rim—a global epicenter of transnational care migration. Using a multi-scalar approach that addresses micro, meso, and macro levels, chapters examine three domains: care provisioning, the supply of and demand for care work, and the shaping and framing of care. The analysis reveals that multiple forms of global inequalities are now playing out in the most intimate of spaces.

Care Work in Europe Claire Cameron, Peter Moss, 2007-09-06 Care Work in Europe provides a cross-national and cross-sectoral study of care work in Europe today, covering policy, provision and practice, as well as exploring how care work is conceptualized and understood. Drawing on a study which looks at care work across the life course in a number of European countries, this book: explores the context and emerging policy agendas provides an analysis of how different countries and sectors understand and structure care work examines key issues, such as the extreme gendering of the workforce, increasing problems of recruitment and turnover, what kinds of knowledge and education the work requires and what conditions are needed to ensure good quality employment considers possible future directions, including the option of a generic
professional worker, educated to work across the life course and whether ‘care’ will, or should, remain a distinct field of policy and employment. This groundbreaking comparative study provokes much-needed new thinking about the current situation and future direction of care work, an area essential to the social and economic well-being of Europe.

Caring for a Living Francesca Degiuli,2016 The world is aging at a great speed. While this is a remarkable achievement, aging also brings new challenges, among them a growing need for long-term care. 'Caring for a Living' specifically investigates Italy's employment of home eldercare assistance, an arrangement whereby long term care services are bought in the market in the form of private and individualized assistance - predominantly female immigrants.

Caring and Social Justice Marian Barnes,2005-12-05 Care giving has become a high-profile issue in policy and practice, yet much of the literature conceives it as burdensome or even oppressive. Drawing extensively on real-life examples of care giving relationships, Caring and Social Justice reveals an uplifting alternative approach to caring that highlights its contribution to social cohesion and social justice. It offers a clear overview of the literature including debates about an 'ethic of care' and offers a thought-provoking survey ideal for undergraduate and postgraduate study.

Women's ILO Eileen Boris,Dorothea Hoehtker,Susan Zimmerman,2018-02-12 Women’s ILO examines a century-long history of women and their networks involved in and with the ILO, the gendered meaning of labour standards, and the challenges of achieving gender equity through international labour law, transnational campaigns, and local labour policies.

Reconciling Work and Family Responsibilities Catherine Hein,2005 Looks at and synthesizes the experience of governments, employers and trade unions in various countries.

Global Social Policy in the Making Deacon, Bob,2013-07-03 The global economic crisis continue to dominate headlines, yet measures to build a social floor under the global economy and reform global governance have received little attention. In 2012 the Social Protection Floor was adopted as a global social policy measure ensuring that all could have access to essential health care and income security over their lifespan. This book by the world’s leading authority on global social policy examines why and how the Social Protection Floor became ILO, UN and G20 policy and how the World Bank and IMF took steps to lay its foundation. Bob Deacon explains this development in terms of four influences: firstly, shifts in the global social structure, secondly, processes inside international institutions, thirdly, global actors -sometimes individuals - using their positions to make change, and fourthly, shifting discourses about social protection. This much-needed contribution to the field of global social policy will be of interest to students of international relations, international organization and
development studies and should be read by international civil servants in global agencies.

Caring for Our Own Sanda R. Levitsky, 2014-04-17 Caring for Our Own inverts an enduring question of social welfare politics. Rather than ask why the American state hasn't responded to unmet social welfare needs by expanding social entitlements, this book asks: Why don't American families view unmet social welfare needs as the basis for demands for new state entitlements? The answer, Sandra Levitsky argues, lies in a better understanding of how individuals imagine solutions to the social welfare problems they confront and what prevents new understandings of social welfare provision from developing into political demand for alternative social arrangements. Caring for Our Own considers the powerful ways in which existing social policies shape the political imagination, reinforcing longstanding values about family responsibility, subverting grievances grounded in notions of social responsibility, and in some rare cases, constructing new models of social provision that transcend existing ideological divisions in American social politics.

The Oxford Handbook of the Psychology of Working David L. Blustein, 2013-07-11 Researchers and practitioners interested in the role of work in people's lives are faced with the need for new perspectives to support clients, communities, and organizations. This handbook is designed to fill this gap in the literature by focusing on the full spectrum of people who work and who want to work across the diverse contexts that frame working in the 21st century.

Gendering Citizenship in Western Europe Ruth Lister, 2007 This is a collectively written, interdisciplinary, thematic cross-national study, which combines conceptual, theoretical, empirical and policy material in an ambitious and innovative way to explore a key concept in contemporary European political, policy and academic debates. The book is unusual in weaving together the topics of migration and childcare and in studying these issues together within a gendered citizenship framework. It also demonstrates the value of a multi-level conceptualisation of citizenship, stretching from the domestic sphere through the national and European levels to the global. The book is aimed at students of social policy, sociology, European studies, women's studies and politics and at researchers/scholars/policy analysts in the areas of citizenship, gender, welfare states and migration.--BOOK JACKET.

International Encyclopedia of Social Policy Tony Fitzpatrick, Huck-ju Kwon, Nick Manning, James Midgley, Gillian Pascall, 2013-07-04 Available in paperback for the first time, this milestone work offers an in-depth treatment of all aspects of the discipline and practice of social policy globally. Supported by a distinguished international advisory board, the editors have compiled almost 900,000 words across 734 entries written by 284 leading specialists to provide authoritative coverage of concepts, policy actors, welfare institutions and services along a series of national, regional and transnational dimensions. Also included are biographical entries on major policy makers and shapers. The editors have particularly striven to provide strong coverage of differing geographical and cultural traditions so that the variety of social policy, as both an academic discipline and a domain of governance, is reflected. Contributors draw in and make the necessary connections with social
The Routledge Handbook of Feminist Economics Günseli Berik, Ebru Kongar, 2021-05-23

The Routledge Handbook of Feminist Economics presents a comprehensive overview of the contributions of feminist economics to the discipline of economics and beyond. Each chapter situates the topic within the history of the field, reflects upon current debates, and looks forward to identify cutting-edge research. Consistent with feminist economics’ goal of strong objectivity, this Handbook compiles contributions from different traditions in feminist economics (including but not limited to Marxian political economy, institutionalist economics, ecological economics and neoclassical economics) and from different disciplines (such as economics, philosophy and political science). The Handbook delineates the social provisioning methodology and highlights its insights for the development of feminist economics. The contributors are a diverse mix of established and rising scholars of feminist economics from around the globe who skilfully frame the current state and future direction of feminist economic scholarship. This carefully crafted volume will be an essential resource for researchers and instructors of feminist economics.

Promoting Income Security as a Right Guy Standing, 2005-03-01

This book is about an idea that has a long and distinguished pedigree, the idea of a right to a basic income. This means having a modest income guaranteed – a right without conditions, just as every citizen should have the right to clean water, fresh air and a good education.

The Oxford Handbook of Transnational Feminist Movements Daniel Beland, Christopher Howard, Kimberly J. Morgan, 2015-02-25

The American welfare state has long been a source of political contention and academic debate. This Oxford Handbook pulls together much of our current knowledge about the origins, development, functions, and challenges of American social policy. After the Introduction, the first substantive part of the handbook offers an historical overview of U.S. social policy from the colonial era to the present. This is followed by a set of chapters on different theoretical perspectives available for understanding and explaining the development of U.S. social policy. The three following parts of the volume focus on concrete social programs for the elderly, the poor and near-poor, the disabled, and workers and families. Policy areas covered include health care, pensions, food assistance, housing, unemployment benefits, disability benefits, workers' compensation, family support, and programs for soldiers and veterans. The final part of the book focuses on some of the
consequences of the U.S. welfare state for poverty, inequality, and citizenship. Many of the chapters comprising this handbook emphasize the disjointed patterns of policy making inherent to U.S. policymaking and the public-private mix of social provision in which the government helps certain groups of citizens directly (e.g., social insurance) or indirectly (e.g., tax expenditures, regulations). The contributing authors are experts from political science, sociology, history, economics, and other social sciences.

The Oxford Handbook of Transnational Feminist Movements Rawwida Baksh-Soodeen, Wendy Harcourt, 2015 The Oxford Handbook of Transnational Feminist Movements explores the historical, political, economic and social contexts in which transnational feminist movements have emerged and spread, and the contributions they have made to global knowledge, power and social change over the past half century. The publication of the handbook in 2015 marks the fortieth anniversary of the United Nations International Women’s Year, the thirtieth anniversary of the Third World Conference on Women held in Nairobi, the twentieth anniversary of the Beijing Declaration and Platform for Action, and the fifteenth anniversaries of the Millennium Development Goals and of UN Security Council Resolution 1325 on ‘women, peace and security’. The editors and contributors critically interrogate transnational feminist movements from a broad spectrum of locations in the global South and North: feminist organizations and networks at all levels (local, national, regional, global and ‘glocal’); wider civil society organizations and networks; governmental and multilateral agencies; and academic and research institutions, among others. The handbook reflects candidly on what we have learned about transnational feminist movements. What are the different spaces from which transnational feminisms have operated and in what ways? How have they contributed to our understanding of the myriad formal and informal ways in which gendered power relations define and inform everyday life? To what extent have they destabilized or transformed the global hegemonic systems that constitute patriarchy? From a position of fifty years of knowledge production, activism, working with institutions, and critical reflection, the handbook recognizes that transnational feminist movements form a key epistemic community that can inspire and provide leadership in shaping political spaces and institutions at all levels, and transforming international political economy, development and peace processes. The handbook is organized into ten sections, each beginning with an introduction by the editors. The sections explore the main themes that have emerged from transnational feminist movements: knowledge, theory and praxis; organizing for change; body politics, health and well-being; human rights and human security; economic and social justice; citizenship and statebuilding; militarism and religious fundamentalisms; peace movements, UNSCR 1325 and postconflict rebuilding; feminist political ecology; and digital-age transformations and future trajectories.

Contemporary Social Issues in East Asian Societies: Examining the Spectrum of Public and Private Spheres Merviö, Mika Markus, 2014-01-31 While the balance between private and public sectors are based primarily on the experiences of the wealthy societies in Western Europe and North America, the global reach and increased political weight of East Asian
economies is bound to influence other societies as well. Contemporary Social Issues in East Asian Societies: Examining the Spectrum of Public and Private Spheres focuses on modern highly developed East Asian societies and their social issues, particularly ones that are related to family, institution, and health. By examining the modernized global society and its connectedness, this book is a vital resource for researchers, students, and academicians interested in the distinctive features connected with local, social and cultural traditions of East Asian society.
